Updated Recovery Status from The Tohoku District –off the Pacific Ocean Earthquake

The following provides a damage and a status of restoration report for ROHM Group production sites which operations have been suspended. The report is as of 18:00pm, March 22nd Japan time. Rohm formed "Headquarter for Emergency Control" at 15:00pm, March 15th in an effort of collecting information for quick restoration from the influences.

1: Status of production facilities near the epicenter:

OKI Semiconductor Miyagi Co., Ltd.

Address	1 Okinohira, Ohira Village, Kurokawa County, Miyagi 981-3603
Products	LSI
Status	Although the electric power supply has been resumed, the industrial water supply has not yet to be fully restored as of today. The restart of the operation is underway; as soon as the infrastructure is reestablished, we will resume our operation. In addition, a substitute production system is being formulated at the ROHM Kyoto main factory and ROHM Hamamatsu Co., Ltd. Efforts are being made to maintain a supply system that will fulfill customer's orders.

ROHM Tsukuba Co., Ltd.

Address	10 Kitahara, Tsukuba City, Ibaraki 300-3293
Products	Transistors, diodes
Status	As the industrial water supply has restored, the purified water facility has been initiated to restart. We continue to make efforts toward restration scheduled of April 1. Further more, thanks to the formulation of a substitute production system at ROHM Wako Devices Co., Ltd. and ROHM Apollo Devices Co., Ltd., a supply system is maintained to fulfill customer orders.

MEMO

2: Influences from the Scheduled Power Outages in East Japan:

The following ROHM Group locations are subject to scheduled electric power outages in the East Japan region as of today.

- **Production**
OKI Semiconductor Co., Ltd. (Hachioji City, Tokyo)
- **Development**
ROHM Yokohama Technology Center (Kohoku-ku, Yokohama)
- **Sales**
West Tokyo Business Center (Hachioji City, Tokyo)....among other locations...
Takasaki Sales Branch (Takasaki City, Gunma)

Service problems in the transportation network have hampered the commuting schedules of some employees, however, operations are continuing at all locations as much as possible with necessary adjustments.

Not affected by scheduled power outages of the Tohoku Electric Power Company.

3: Influences from the Supply Chain:

Some of the companies providing us with such products as semiconductor materials, chemical liquid used for semiconductor manufacturing processes, and chemicals are damaged from the earthquake. We are currently in the process of investigating and confirming their status from the impacts and the progress in restoration process. Rohm is working hard to procure enough materials necessary to secure required supply from the customers

4: Foresights:

We are trying to restore each of the manufacturing sites with security. Updates and foresights will be provided as soon as available.
